Store, and more.		
Airplane Mode	Ask to Join Networks	Notify >
🛜 Wi-Fi MSD Decatur	Known networks will be joined automatically. If no known networks are available, you will be notified of available networks.	
Bluetooth On		
	Auto-Join Hotspot	Ask to Join >
Notifications	Allow this device to automatically discover nearby personal hotspots when no Wi-Fi network is available.	

Step 4: For the district network, type in your Skyward username and password. For home networks, simply type in the password setup by the network owner or locate the default password on the bottom of your wireless router.

Step 5: Select "Join" and your iPad will connect to the network. Note: you may need to select "Trust" before the iPad is allowed to connect.

*You should only have to do this one time, and then each time you are at home, your iPad should recognize your network and automatically connect.
